FOR IMMEDIATE RELEASE:

July 30, 2024

ISUZU IS AWARDED CARB AND EPA CERTIFICATIONS FOR ZERO-EMISSION NRR-EV.

CARB and the EPA have certified the new Isuzu NRR-EV as a zero-emission vehicle. These certifications allow the NRR-EV to be sold nationwide.

ANAHEIM, Calif.—Isuzu Commercial Truck of America, Inc., distributor of America's best-selling low cab forward trucks, has been awarded zero-emission certifications by the California Air Resources Board (CARB) and the Environmental Protection Agency (EPA) for the Isuzu NRR-EV.

CARB and the EPA have been accelerating the adoption of zero-emission vehicles across the United States to combat climate change, reduce air pollution, and promote sustainable transportation solutions nationwide. Their requirements mandate ambitious targets for companies to transition to cleaner, zero-emission technologies. The new Isuzu NRR-EV is now approved for sale in all 50 states. The NRR-EV will be assembled in Charlotte, Michigan starting in August 2024.

The zero-emission certifications validate Isuzu's adherence to stringent emissions standards and regulatory requirements, demonstrating compliance with federal and state environmental regulations. The new Isuzu NRR-EV is positioned as a viable medium duty truck option for fleets seeking to both reduce their carbon footprint and comply with increasingly strict emissions regulations.

"For us at Isuzu, this truck showcases our commitment to innovation in delivering sustainable transportation solutions for the future. The certifications for our NRR-EV are a major step in providing customers with a medium-duty vehicle that lessens their carbon footprint and meets new fleet regulations," says Shaun Skinner, President of Isuzu Commercial Truck of America.

About CARB: The California Air Resources Board is a department of the California Environmental Protection Agency. CARB's mission is to promote and protect public health, welfare, and ecological resources through the effective reduction of air pollutants while recognizing and considering the effects on the economy of the state.

About EPA: The Environmental Protection Agency is an agency of the United States federal government whose mission is to protect human and environmental health. Since its founding, the EPA has been working for a cleaner, healthier environment for the American people.
